AltiGen SIP Trunk Service

Reliable Business-Class VoIP Service for IP-PBX and Contact Center

AltiGen's SIP Trunk Service is a cost-effective enterprise grade VoIP solution optimized for the company's complete Cloud-based and premise-based IP-PBX and Contact Center product line. By leveraging state-of-the-art intelligent call routing and interconnecting with tier 1 carriers, AltiGen's SIP Trunk Service delivers the high quality voice calls that are expected in the business environment. Unlike the per subscriber SIP plans offered by other SIP providers, with AltiGen's SIP Trunk Service, businesses can purchase SIP minute bundles that can be shared between their employees.

Optimized for AltiGen Solutions

· MaxCS Private Cloud
· MaxCS Softswitch SaaS
· All Software Softswitch
· All-In-One Hardware Platforms
  (Max1000/2000, Office 3G, etc...)

Fast Service Delivery

Same Day SIP Trunk Service

The AltiGen SIP Trunk Service is powered by SIPTrunk Inc., a strategic partner who has deployed a geo-redundant N+1 network across three different points of presence (PoPs) to ensure uptime and service availability. AltiGen has worked closely with SIPTrunk Inc. to fully integrate our systems to enable fast SIP Trunk service delivery, real-time DID number selection and rapid number porting.   Through AltiGen's Cloud Services Portal, authorized partners are able to help their customers efficiently order and manage SIP Trunk services.
