

Polycom Location-Based E911 Configuration Guide

This document describes how to configure Location-based E911 for Polycom extensions. These instructions apply to MaxCS Release 8.0 and Release 8.5. This guide explains how to configure Location-based E911 while setting up new Polycom phones, and also shows how to assign or change E911 settings on Polycom IP phones that have already been deployed in a MaxCS system.
