Application: AltAdmin  
Hardware: N/A  
Keywords: Administrator, Admin, AltAdmin, MAXCS, Font, Print, Text, Small, Difficult, Hard, Theme, Resolution  
Obsolete: No

**Problem:**

You may occasionally run into an issue where the font within the windows of AltAdmin is small or difficult to read. The issue becomes more noticeable with higher resolution displays.

**Solution:**

AltAdmin uses the font from the current Windows theme. To resolve, we can simply change or modify the theme.

- 1) Right click anywhere on the desktop and choose Properties.
- 2) Click the Appearance tab and change the 'Windows and Buttons' dropdown to 'Windows Classic Style.'
- 3) Apply the change and then close and reopen Admin.
